**Product capacities will vary based on the shape and size of the bottle.

- The HV3 is a low-cost, energy-efficient alternative to the Pepsi HVV. Standard Features include LED lights, curved sign face, sleek new selection buttons and DBV panel, T-Handel with Quicker Lock.
- The HVV is designed to attract attention in high volume locations. Standard Features include: LED lights, curved signface, cast DBV panel, large selection buttons, and electronic locking system.
- The V21 stack allows for maximum flexibility during product loading. Most products can be loaded caps to back, butt-to butt, or in combination.
- Full function MDB controller with DEX/UCS, recycler and wireless telemetry compatibility.
- Energy Management features include real-time clock, lighting and refrigeration controls, cyclopentane injected foam insulation (HFC free) and Use of Natural Refrigerant R290 (propane) with a GWP of 3.
- The V21 uses 24 volt, DC motors that are installed with only two screws for easy servicing. There are no micro switches or timing cams.
- Slide out loading rack allows for greater access to the columns for two handed product loading.
- The time tested V21 product delivery system design ensures reliable vends due to reduced sensitivity to package dimensions.
- The V21's low friction coated vend chute provides smooth product delivery.
- ADA compliant, UL certified, ENERGY STAR certified, meets or exceeds DOE & EPA requirements, suitable for indoor or outdoor locations.
